Aquarium

The appeal for water features as a place to relax and unwind in the modern garden remains very strong. But often the space and time required to build and establish traditional ponds is not compatible with consumers who have smaller gardens and demand more convenient solutions for every aspect of their life.

Now anyone can fulfil their aspirations of having an attractive water feature with the new outdoor decorative aquarium. Installation is convenient and easy to complete in around 30 minutes with no digging, tools or construction expertise required.

The result is an above-ground water feature complete with a modern decorative finish and side viewing windows that allow you to observe fish from a natural perspective in an ideal environment for successful fish keeping.

This is a great way to experience the pleasures of a pond, perhaps for the first time or as an experienced former owner but without the traditional drawbacks of a prolonged and difficult installation process.

EasyClear®

The award winning fully integrated filtration system

The EasyClear range comprises five units for ponds up to 3000, 4500, 6000, 7500 and 9000 litres

These fully integrated units combine a pump, filter and UVC and can be completely hidden in the pond

They provide the consumer with a product that will provide clear and healthy water, easy installation, and an attractive fountain and/or waterfall

Easyclear 9000

3 YEAR GUARANTEE

Clearwater GUARANTEE

EasyClear Benefits:

Clear water

- The UVC eliminates green water.
- Filter foam sieves out solid particles in the water.

Healthy Water

- Kaldnes™ biomedia ensures that the water is healthy for fish and plants.
- The Kaldnes™ biomedia is now stored under the foams in gauze bags for quick and easy cleaning.

Fountain & Waterfall

- Reliable and attractive fountain and waterfall display. (EasyClear 6000, 7500 & 9000 can run a fountain and waterfall simultaneously. EasyClear 3000/4500 can run a fountain or waterfall).
- 3 fountainhead options for consumer display choice (2 tier, 3 tier and bell).

Easy Installation

- One power cable for simple and cost effective installation.
- Ball joint for easy levelling of the fountainhead.
- Feet for stability.
- Fountain stem extension for varying pond depths.
- Independent flow control to adjust the size of the fountain.
- Independent flow control to adjust the size of the waterfall.

Easy Maintenance

- Latch for tool free access for cleaning foams and Kaldnes™ biomedia.
- Anti-clog fountain strainer for low maintenance.
- Bayonet fitting for easy access to the UVC for cleaning and changing.
- Water bypass allows continued UVC and fountain operation if foam is blocked.

Bioforce® Revolution

A Pressurised Pond Filter that makes pond maintenance quick and easy, no more dirty hands, simply wind the handle to clean

For ponds up to 28,000 litres (6,160 gallons)

2 YEAR GUARANTEE

Clearwater GUARANTEE

Bioforce Revolution

The Bioforce Revolution range features a patented, easy clean system and is combined with a 3 step filter process:

UVC

- Enhanced wattage UVC Bulb to eliminate green water. Contained in a quick access chamber for trouble free replacement with viewing window that glows when operating and integrated turbulator.

Biological Filtration

- Large surface area Kaldnes™ K3 biological media, accommodates beneficial bacteria in a bug bungalow, to maintain clear and healthy water.

Mechanical Filtration

- A new approach using foam cubes, provides increased surface area for bacteria growth and facilitates easy cleaning mechanism.
- Unique winding handle activates paddles inside the chamber and agitates the foam cubes and loosens accumulated green sludge.
- Diverter valve is switched to direct unwanted dirty water to surrounding garden areas outside the pond.

Flexible and un-obtrusive

Bioforce Revolution is pre-assembled for easy installation with a new pond or an existing filtration system.

The unit can be hidden at the side of a pond or buried in the ground up to the level of hose inlets.

The pressurised filter allows the water to be pumped to a higher exit point to create relaxing waterfalls.

Aquaforce

Solids Handling Pumps for filtration, waterfalls and watercourses

Aquaforce 15000

5 YEAR GUARANTEE

Clearwater GUARANTEE

Aquaforce

Performance

The Hozelock range of Aquaforce pumps is powerful and power efficient but also flexible for different consumer needs.

The Aquaforce range has improved flow rates to ensure water clarity and waterfall power are optimised. The range also has improved wattages, which means consumers will be delighted with the reduced running costs.

The motors feature a water-cooling system, which ensures that the pumps are kept at a constant temperature and reduce the risk of overheating. Ceramic bearings along with thrust washers ensure the motors are ultra reliable.

Extensive testing has been carried out to ensure the reliability of the pumps and a 5-year guarantee is offered for all models.

The Aquaforces have a considerably increased cage surface area, which allows the maximum amount of waste to be collected and pumped to the filter system. It also means that the cage is far less likely to clog, which will save the consumer from constant cleaning.

Features

All Aquaforces come with a wildlife protection insert that allows the consumer to reduce the inlet solids diameter from 6mm/10mm (dependant on model) to 2mm. This prevents wildlife such as tadpoles, newts and small fish getting into the cage.

The larger Aquaforces (6000, 8000, 12000 & 15000) are all able to operate amphibiously.

These larger models feature a second inlet, which allows the consumer to operate an optional skimmer or satellite filter. Additionally the included flow control also allows the consumer to adjust the flow of water to their waterfall or filter. It also allows the consumer to control the amount of water being drawn from the second inlet.

Easy Installation and Maintenance

Sturdy carry handle helps with installation and maintenance.

The cage clips allow the consumer easy, tool free access to the pump for maintenance.

As with all Hozelock Cyprio products the new Aquaforce pumps have a full spares support package.

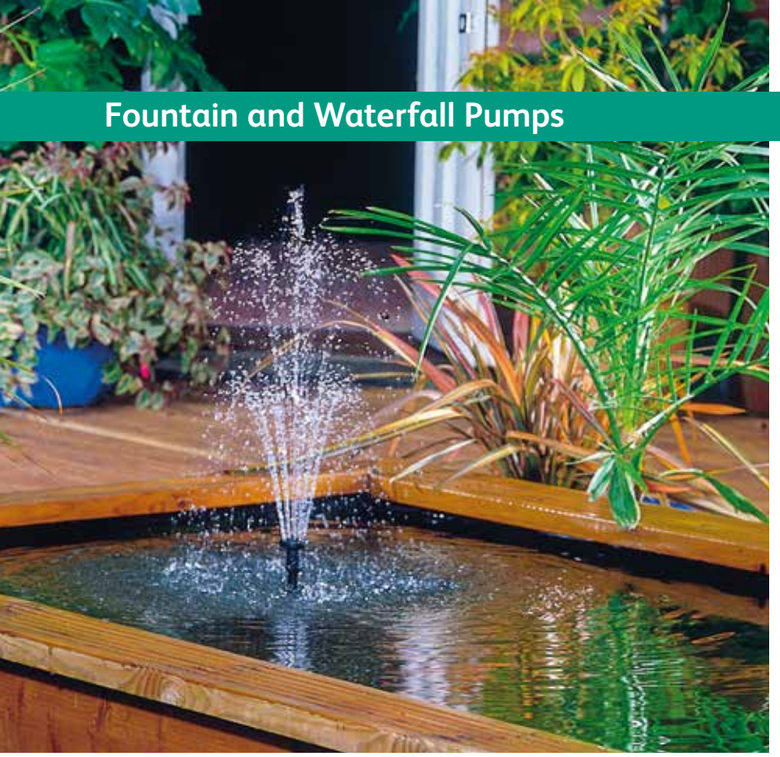
Fountain and Waterfall Pumps



Cascade

Ideal for all decorative ponds

A range of sizes for operating everything from small water features to larger combined fountain and waterfall displays

Cascade 4000

3 YEAR GUARANTEE

Use a Cascade for:

Fountains

They all come complete with a selection of distinctive fountain displays and the Cascade 700 to 4000 with a bell jet. All pumps up to the 4000 also have a telescopic fountain stem.

Waterfalls

The Cascade 700 will give a good small waterfall and the 4000 will give a torrent. Cascades from 1500 up come with a T-piece that enables them to be used for two purposes at the same time.

Water Features

All models can run water features with the attachment of appropriate pipe.

Filtration

Water can be pumped to a filter and directly back to the pond, or down a waterfall. Filtration will be more effective if an Aquaforce solids handling pump is used.

Cascade features

- High efficiency motor for low running costs and long life.
- Flow controls to adjust size of fountain and waterfall independently.
- Ball joint for fountain stem angle adjustment.
- Anti-clog foam free inlet cage reduces maintenance.
- Special outlet for waterfall or feature with quick connect hose coupling.
- Telescopic fountain pipe.

Pond Vac

A compact and lightweight pond vacuum for quickly cleaning and removing waste from ponds with minimum effort

3 YEAR GUARANTEE

Saves up to 30% in cleaning time

Unlike most other Pond Vacs, this product runs continuously and does not have to stop every minute for the collection chamber to be emptied.

Up to 50% greater suction

The highly efficient design delivers greater suction than other products available. The combination of high suction and low power consumption makes the Pond Vac up to 7 times more efficient and minimises running costs.

Supplied with a choice of three brightly coloured nozzles for clear in-pond visibility, the Pond Vac is capable of removing particles from all areas of the pond. Cutter blades are built into the head assembly so that any large debris such as leaves passing through can be chopped up to avoid blockage.

Pond Vac features

- **A** Extendable up to 2.0m (4 x 0.4m sections) for long reach.
- **B** Three suction nozzles: 'wide' for large areas, 'narrow' for small corners & 'open' for large waste. Nozzle storage point provided.
- **C** Chopping blades allow removal of large waste matter.
- **D** Transparent section for viewing waste disposal.
- **E** Adjustable handle position for comfortable use.

Pond Accessories

Flow Control Valve

Control the flow of water to pond filtration systems, waterfalls and water features.
Stepped hosetails allows connection of 25 - 40mm hose and flow can be restricted using the easy to turn handle.

Code	1758
Product	**Flow Control Valve** • ø 25mm (1"), 32mm (1¼") & 40mm (1½")
Pack Quantity	5
Barcode	5 010646 056052

Hose Tap Flow Controllers

Hose tap flow controllers fit between two hoses, controlling the water flow.
This enables two pieces of equipment (eg a pump and filter) with different flow rates to be compatible.
Available in 3 sizes.

Code	3994	3995	3996
Product	**Hose Tap Flow Control** • ø 12mm (½")	**Hose Tap Flow Control** • ø 20mm (¾")	**Hose Tap Flow Control** • ø 25mm (1")
Pack Quantity	25	25	25
Barcode	5 010646 011952	5 010646 011969	5 010646 011976

Stepped Hosetails

Stepped hosetails are used to reduce the internal size of the hose.
Fits various hose types, simply cut off the size not required for maximum flow to enable a slightly smaller pipe to fit the connection.
Available in 3 sizes.

Code	1427	1434	1435
Product	**Stepped Hosetail 1¼"** • ø 12mm (½"), 20mm (¾"), 25mm (1") & 32mm (1¼")	**Stepped Hosetail 1½"** • ø 20mm (¾"), 25mm (1"), 32mm (1¼") & 40mm (1½")	**Stepped Hosetail ¾"** • ø 12mm (½"), 15mm (¾"), 20mm (¾") & 25mm (1")
Pack Quantity	25	25	25
Barcode	5 010646 031066	5 010646 032629	5 010646 032612

Universal Tee Pieces

Universal tee adaptors are designed to fit different hose widths.
Available in 2 sizes.

Code	1728	1729
Product	**Small Universal Tee** • ø 12mm (½"), 15mm (¾"), 20mm (¾") & 25mm (1")	**Large Universal Tee** • ø 20mm (¾"), 25mm (1"), 32mm (1¼") & 40mm (1½")
Pack Quantity	25	8
Barcode	5 010646 031820	5 010646 031813

Hose Tee Pieces

Hozelock Hose Tee Pieces, are designed to fit different hose sizes and allow three hoses to be connected at a junction point.
Available in 4 sizes.

Code	3991	3992	3993	1723
Product	**Hose Tee Piece** • ø 12mm (½")	**Hose Tee Piece** • ø 20mm (¾")	**Hose Tee Piece** • ø 25mm (1")	**Hose Tee Piece** • ø 32mm (1¼")
Pack Quantity	50	25	25	25
